Education

The George Washington University — Washington, D.C.
Master of Science in Computer Science — *Aug 2025 – May 2027*

Istanbul Arel University — Istanbul, Turkey
Bachelor of Science in Computer Engineering — *Oct 2021 – Jun 2025*

Relevant Coursework: Design & Analysis of Algorithms, Design of Autonomous Systems, Software Engineering, Computer System Architecture, Database Management Systems, Cloud Computing, Computer Networks,
Awards: International Impact Award, Top of Department - B.S. Computer Engineering, Istanbul Arel University

Technical Skills

Languages: Java, C, C++, Python, JavaScript (ES6+), TypeScript, SQL, HTML, CSS
Frameworks: React, React Native, Next.js, Node.js, Express, Spring Boot, FastAPI, Redux Toolkit
Tools: Claude Code, Codex, Docker, Git, GitHub, GitLab, Linux, AWS, PostgreSQL, MongoDB, SQLite, REST APIs, Microservices, MVC, JUnit, Mockito, Pytest, CI/CD

Experience

Software Engineer — May 2025 – Aug 2025
B Tech Analytics Technology — *Istanbul, Turkey*

- Built a **BI platform** using **SolidStart**, **Tailwind**, and **Apache ECharts** to track competitor pricing and marketing, enabling ∼**20% faster reporting** for decision-makers.
- Improved backend performance and scalability by migrating from **SQLite** to **DuckDB**, reducing query latency by ∼**45%**.
- Designed data processing workflows enabling efficient querying of large datasets for business insights.

Software Engineer Intern — Feb 2025 – May 2025
B Tech Analytics Technology — *Istanbul, Turkey*

- Refactored frontend architecture using **TypeScript** and **TailwindCSS**, improving performance by **25%**.
- Built an automated asset pipeline (PNG → WebP), reducing load times by ∼**50%**.

Projects

Dromos | *React Native, Go, Node.js, Python, TimescaleDB, PostGIS, Kafka* — May 2026 – Jun 2026

- Built a cross-platform fitness app with route generation using **GraphHopper** and **OpenStreetMap**.
- Engineered a **Go WebSocket** GPS ingestion pipeline handling 50K+ concurrent connections.
- Designed an event-driven architecture across 9 microservices using **Apache Kafka** and **Kong API Gateway**.

Incident Copilot | *Python, FastAPI, Anthropic Claude API, GitPython, Slack API, Prometheus, Docker* — Jul 2026

- Built an autonomous AI system that responds to production outages and traces them to the likely bad commit using metrics, logs, and deploys.
- Designed a provider-agnostic LLM abstraction supporting the **Claude API**, Ollama, and vLLM.
- Posts a **Slack** brief with root cause, runbook, and user impact, then auto-generates a postmortem.

Apartment Seeker | *React, Redux, Node.js, Express.js, MongoDB, Socket.io, Mapbox* — Jan 2021 – Jan 2022

- Built a full-stack **MERN** rental platform for posting and searching apartments, with map-based search powered by **Mapbox**.
- Enabled real-time chat between renters and listing owners using **Socket.io**.
- Implemented authentication, CRUD operations, and secure data persistence with **Express** and **MongoDB**.

Multithreaded Image Processing Application | *C++* — Mar 2024 – May 2024

- Parallelized CPU-bound image processing workloads in **C++**, improving execution speed by **78%**.
- Implemented concurrent pipelines with thread synchronization and workload partitioning.
